DETAILED ACTION

Applicant's election of Group III, claims 16-25 in the reply filed on 8/08/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Upon further consideration, it is deemed that an Election of Species is in order:

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Mammea Americana, *Callistemon citrinus* and *Marchantia polymorpha*.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 16,24 and 25 are directed toward *Mammea Americana* or *Callistemon citrinus*.

Claims 17 and 20 are directed toward *Mammea Americana*.

Claim 18 and 21 are directed toward *Marchantia polymorpha*.

Claim 19 and 22 are directed toward *Callistemon citrinus*.

Claim 23 is directed toward *Mammea Americana*, *Callistemon citrinus* and *Marchantia polymorpha*.

The following claim(s) are generic: Claims 16, 24 and 25 are generic to *Mammea Americana* or *Callistemon citrinus*.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each respective plant originates from a different species and genus and would therefore contain vastly different endogenous phytochemical constituents. One would expect that extracts from these herbs would have quite different results with regard to anti-microbial activity due to the diversity of their phytochemical constituents.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia Leith whose telephone number is (571) 272-0968. The examiner can normally be reached on Monday - Friday 8:30am-5:00pm.
